INTRODUCTION

I am a Computer Science student with a strong foundation in frontend development and a keen interest in backend technologies. Currently learning backend development, I am passionate about building dynamic and scalable web applications. I am looking forward to becoming a full-stack developer and continuously enhancing my skills to create efficient and user-friendly digital solutions.

WORK EXPERIENCE

Front-end development Intern

- Encryptix

- ❖ Worked on real-world projects, contributing to frontend tasks while following best coding practices.
- ❖ Enhanced problem-solving and debugging skills by addressing technical challenges faced during the development process.
- ❖ Collaborated with a team of developers to design and implement responsive web applications.

Attendance Portal and System Development

- Antra Prerna Cell

- ❖ As a core member, I led the development of an attendance portal and other software solutions.
- ❖ I managed the design and implementation and also involved collaborating with a team to develop customized software.
- ❖ Worked on both frontend and backend technology.

EDUCATION

Ramanujan College, University of Delhi

PROJECTS

➤ Home Service Website

- **Developed** a home service website, **SAMIP**, enabling two-way interaction for efficient service booking and management.
- **Designed** and implemented a user-friendly **UI/UX** to streamline the process of finding and booking home maintenance services.
- **Integrated** features for **real-time communication** between users and service providers for clarity and task customization.
- **Facilitated** seamless access to services like **plumbing, electrical repairs, and cleaning** with an intuitive interface.

➤ College Website

- **Developed** the frontend of a college website using HTML, CSS, JavaScript, and Bootstrap for a responsive design.
- **Designed** an intuitive **UI/UX** for seamless navigation of academic resources, events, and announcements.
- **Implemented** interactive elements such as **navigation menus, course listings, and faculty profiles** for better user experience.
- **Optimized** website performance with **clean, structured, and reusable code** for scalability.

➤ Kitaabi Duniya

- Developed the frontend of the **Kitaabi Duniya** website using HTML, CSS, JavaScript, and Bootstrap for a visually appealing and responsive design.
- Designed an intuitive **UI/UX** for seamless browsing of books, reviews, and recommendations.
- Implemented interactive features such as category-based **book listings, search functionality, and user reviews** to enhance engagement.
- Optimized website performance with **clean, structured, and reusable code** for scalability and faster load times.

➤ Personal Freelancing Website

- Developed a personal freelancing website to offer services in Full-Stack Development, Frontend Development, Backend Development, and Web Design.
- Integrated a seamless contact and request system, allowing users to connect with me and submit website development requests directly.
- Implemented backend functionalities to handle user inquiries, project requests, and service management efficiently.
- Designed an intuitive and responsive UI/UX for a smooth user experience, ensuring easy navigation and interaction.

SKILLS

Prog. Languages: Python, Java, JavaScript

Frameworks: React.js, Node.js, Express.js

Databases: Mysql, MongoDB

Achievement

- State Level Winner in Vedic Mathematics
- Bronze level in codechef (solved 50+ DSA question)
- Hackathon Certificate
